PERCEPTRONIX TO EXHIBIT AT THOMPSON OKANAGAN DENTAL MEETING

VANCOUVER, CANADA (October 22, 2008) – Perceptronix Medical Inc., an independent quantitative cytology laboratory specializing in early cancer diagnosis, will be exhibiting at the Thompson Okanagan Dental Meeting on October 24, 2008 in Kelowna, Canada. Perceptronix will be showcasing OralAdvance™, the first quantitative cytology test for the early detection of oral cancer, as well as demonstrating how to use the cyto-brush sample collection kit at booth 52.

With recent advances in visualization techniques for the oral cavity, dentists are encountering more lesions of potential interest for diagnostic biopsy. OralAdvance™, with its cyto-brush sample collection kit, provides dentists with an informative new option for assessing these lesions before biopsy, potentially reducing the number of biopsies needed.

About Perceptronix Medical Inc.

Perceptronix Medical Inc (“Perceptronix” or the “Company”) is a privately owned, independent cytology laboratory and cancer diagnostics company specializing in the provision of innovative early cancer detection tests based on quantitative cytology. The Company’s DNA image cytometry technology was developed in partnership with the British Columbia Cancer Agency (BCCA) in Vancouver. Quantitative cytology provides physicians with an improved cytopathology assessment based on an objective measure of large-scale DNA abnormality that can indicate precancerous or cancerous changes. In addition to general [quantitative cytology services](#), the company has developed innovative tests for the early detection of lung cancer and oral cancer.
